PROPOSAL FOR BYD ZIMBABWE · TSAPO GROUP · 22 OCTOBER 2026

From interest to ownership: converting Zimbabwe's EV sceptics

WHERE BYD STANDS

The showroom is open, the Atto 8 launched in August, local assembly is agreed and a charging network is planned. Awareness is no longer the problem. The harder question is the one every buyer asks privately: will this work for me, here? They worry about load-shedding, chargers outside Harare, servicing and resale. Launch content cannot answer that. Proof from people like them can, with a sales process that responds the moment they ask.

WHAT WE PROPOSE

1 · Proof from local owners

Six filmed stories from private owners and fleet operators, covering real running costs, charging routines and servicing. Short films answering the ten questions buyers ask most. AI-produced images of each model in local settings, at volume.

2 · A case for fleets

Fleet and corporate buyers are likely to carry the volume. We build a savings calculator comparing fuel with electricity on a buyer's own routes, plus a fleet pack for procurement teams and boards.

3 · An enquiry-to-sale system

A WhatsApp assistant that answers questions on range, charging and price at any hour, books test drives and passes fleet leads to sales. Every lead is tracked to a sale and reported monthly.

HOW IT RUNS

Clarity Sprint · 2 weeks

Interviews with sales staff, owners and lost prospects. We confirm which buyers convert, what stops the rest, and what to build.

→

Build · 8 weeks

Owner films, answer films, AI visuals, the fleet calculator and pack, and the WhatsApp system, all live.

→

Run · monthly

We run it as your fractional marketing lead and report enquiries, test drives and sales.

INVESTMENT

STAGE	SCOPE	FEE
Clarity Sprint	Buyer research, objection map and a written plan. Yours to keep, whether or not we go further.	**US$1,500**
Build	All three parts above, delivered and live.	**US$8,500**
Run	Monthly content, system management and reporting.	**from US$2,000 / month**

Sprint payable in advance. Build 50% on signature, 50% on delivery. Excludes travel beyond Harare. Valid for 30 days.

LATER: MADE IN ZIMBABWE

The assembly plant and its skills-transfer programme are not built yet. We would like to document both from the first day. A record like that cannot be made after the fact.

NEXT STEP

A 30-minute conversation with your sales lead to test these assumptions. The Sprint can begin within a week.
