Katungo

MEDIA · DESIGN · INTELLIGENT ADVISORY · HARARE

From story to scale.

A story rooted in Harare, delivered at a standard that reads as credible from Harare to Lagos to London.

We help businesses reach the right customers, give them a clear reason to choose, meet them at the right moment, and turn that into revenue and loyalty.

THREE DISCIPLINES, ONE TEAM

Photography & Cinematography

Real, unstaged moments. Documentary film, brand films, product and people photography, shot on location.

Graphic Design & Branding

Full identities and redesigns, from first sketch to print-ready production. Brand systems, campaigns, signage and print.

Intelligent Advisory

Plain-language AI adoption: audits, automation and content production. AI-built commercial imagery that removes the cost of a studio, crew or models.

THE STORY-TO-SCALE METHOD

1. **Find the right customers.** Which customers make the business money, and why they buy.
2. **Sharpen the reason to choose.** The promise, proof, offers and voice that make them pick you.
3. **Capture the proof.** Real photography, film and testimonials, with AI producing visuals at volume.
4. **Build the system.** AI workflows that reach customers at the right moment, handle enquiries and track every lead to a sale.
5. **Convert and keep.** Run it monthly. Measure enquiries, sales and repeat customers, and adjust.

Once a year the cycle returns to stage one, because the right customers shift as a business grows.

HOW WE WORK

Clarity Sprint

A short, fixed-fee engagement that defines who to win, why they should choose you, and what to build.

→

Build

Content, brand assets and the AI marketing system, delivered as one coherent piece of work.

→

Run

A monthly retainer. We act as your in-house or fractional marketing lead and answer for the results.

WHY KATUNGO

Nobody else in Harare holds film, design and AI advisory under one roof. One team carries your story from the first conversation to the final measured result, without hand-offs between agencies.

We measure what matters to the business: enquiries, sales and repeat customers. AI production lets us deliver visuals at a volume and cost a traditional studio cannot match.
